Logistics and Saudi Arabia's Vision 2030

has identified several key pillars for the 2030 Since its inception, Vision development of the logistics sector, which shows us the extent of the leadership's belief in the importance of this sector, and the need to invest in it and support the development and creative work in the logistics sector to ensure the achievement of added value that is reflected in maximizing the economic impact, especially since the Kingdom of Saudi Arabia has a distinguished geographical location in the middle of global trade lines

**The most prominent objectives of
Vision 2030 in the logistics sector.**

The Kingdom's ranking on the Logistics Performance Index advanced from 00th to the top ten ranks and ensured its regional leadership.

Logistics will support the success of the goal of ranking 3 Saudi cities among the top 100 cities in the world.

Improving the procedures and legislation for licensing logistics services.

Advanced logistics services provide a lower cost for transporting and storing goods of Saudi origin, which encourages local industry initiatives as well as attracting new industrial investors to take advantage of these advantages.

Improve integration with transport patterns by strengthening the links between sea, air, road and rail transport to improve cargo and freight services.

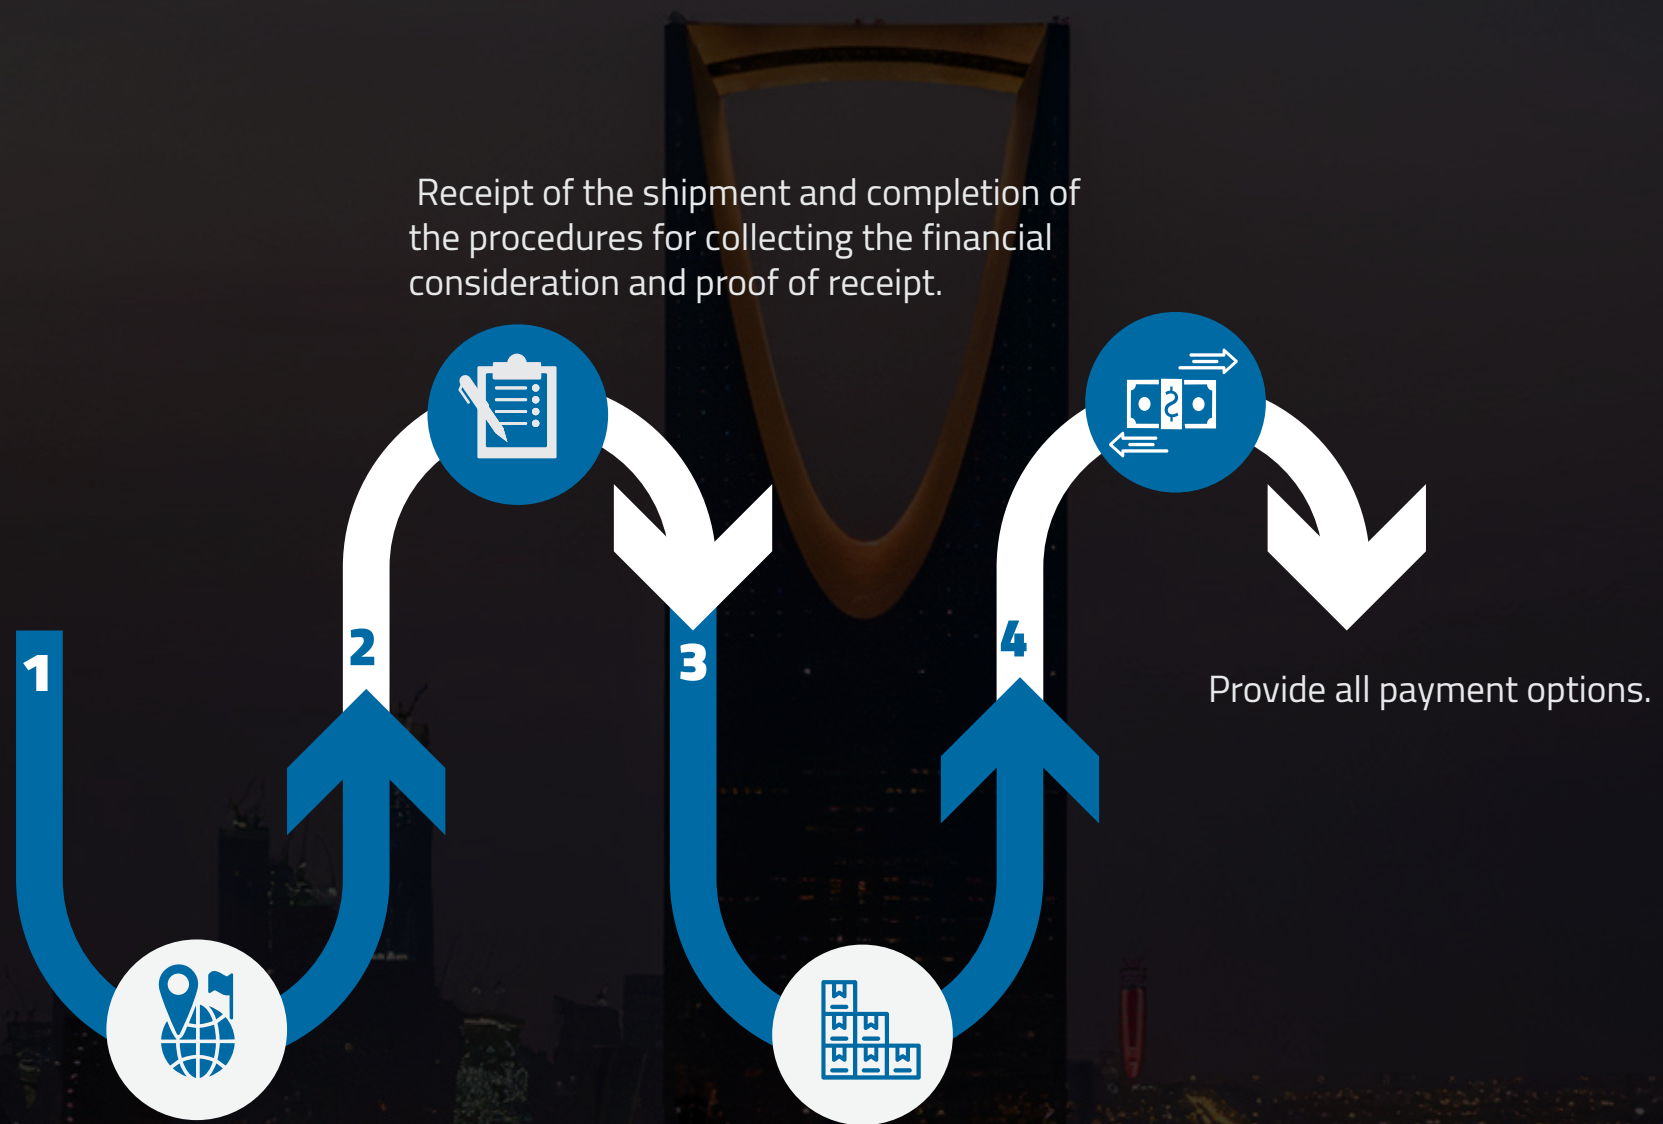

Developing infrastructure and enhancing the participation of the private sector.
